

If Epic View was changed (zoomed in) while logged in through VMWare on Chromebook, when accessing Epic on Desktop, the view may be extremely enlarged.

Locate the following to adjust the font size so the view will return to normal on the Desktop.

It could be the +/- magnifying glass or it could be 

The screenshot displays the Epic EMR interface for a patient named Fillipe - IM Platinum. The top section contains patient demographics and clinical data, including allergies (Sulfa Antibiotics), payor information, and registries. Below this is a navigation bar with tabs for 'Meds & Allergies', 'NB FACESHEET', and 'Imported Legacy Documents'. The main content area shows the 'Medication List' for the patient, with a note to keep the record with the patient and show it to their pharmacist and physician. A magnifying glass icon is circled in blue, and a red box highlights the font size adjustment icons (A<sup>-</sup> and A<sup>+</sup>) in the top right corner of the interface.
